A property like we've never seen before. A unique villa for sale right on the promenade of Puerto Pollensa with spectacular sea views and literally just a few steps away from the beach! You have endless opportunities to turn this into exactly what you wish: various apartments or the villa of your dreams (always depending on permissions of course so we would always suggest getting in touch with a local architect). There are currently two properties, separated by a beautiful courtyard/garden. Don't hesitate to call us for more information, especially if you've always dreamed of living this close to the sea or beach.
